

F. .2 (E)/2023-NDMA (MW/Flood Advisory - VIII)
Government of Pakistan
Prime Minister's Office
National Disaster Management Authority
ISLAMABAD

Dated: **24 August 2023**

Subject: **Vigilance in Light of Consistent High Flows and Forecasted Rain in Upper Catchment Areas of River Sutlej - India**

Reference:

- A. PCIW Flood Base Data dated 22 August 2023.
- B. FFD Bulletin Number C-070/23 dated 23 August 2023.

In reference to the subject and further to above referred letters, there is a need to maintain persistent vigilance over river flows and discharge reports from Indian side. Under the prevailing situation, proactive precautionary/ protective measures already enforced along river Sutlej must continue till the flows/ discharge status from Bhakra and Pong Dam from Indian side are ascertained, likely timeframe next 48-96 hours.

2. According to projections, discharge from Bhakra and Pong Dams will result in a cumulative flow of approximately **126,000 cusecs over next 48-76 hours**, which is consistent with existing flows being recorded at GS Wala and Sulemanki Headworks (higher flows will continue). Detailed information on river flows and forecasts is being shared regularly with all concerned and can be accessed from NDMA, PMD and FFD's web portals.
3. Projections of likely inundation and affected population due to high flows of River Sutlej are attached as **Annex A**, while list of villages is also attached as **Annex B**.
4. Forwarded for information and necessary action, please.
